Company description

Little Electric Energy is an industrial company specialising in the recovery, reconditioning and assembly of second-life batteries from the automotive sector. It develops modular energy storage systems with a focus on sustainability and circular economy.

Products and services

Module or function	
Safety electronics / vehicle dynamics	
Systems related to ESS energy storage. Storage systems plus electric vehicle chargers.	
Auxiliary services	Design, manufacture and integration of energy solutions with second-life batteries for the automotive industry. Testing, reconditioning and full traceability of reused batteries.
Diverse	
Engineering	
Industrial supplies	
Machinery and small integrated lines	

Processes and technologies

Other technologies
Energy system assembly, state of health (SOH) testing, electronics and BMS integration, modular structural assembly, firmware development and energy management software.

Main customers

Galp, Repsol, Iberdrola, Stellantis, Movelco, industrial operators and energy engineering companies.
