Company description

Astrax Movilidad S.L. is responsible for the design and manufacture of the Adapted Motorcycle under the brand "Voar Motos". It is a 3-wheeled electric motorbike, which meets the necessary conditions so that it can be driven by people who need a wheelchair or suffer from another type of physical disability. This vehicle has the necessary facilities to make its use as accessible as possible, as well as sufficient active and passive safety tools to avoid the risks of an accident as much as possible, and in the event of an accident, to reduce the consequences as much as possible.

Products and services

Module or function

Boot

Driving position

Engine

Seats

The Adapted Motorcycle aims to be one more possibility in the range of options for people looking to move around independently without giving up the comfort and independence of a car but saving time in travel and parking as well as money on fuel or parking. Voar Motos is designing and manufacturing the accessible motorbike: aesthetics, functionality, components and the vehicle platform itself that will incorporate these accessibility tools.

Processes and technologies

Assembly

The main activity of Voar Motos is the development of the accessibility tools and the motorbike itself, followed by the manufacture of these vehicles, which is understood as the assembly of the various components, both from suppliers and those designed in-house.
