Company description

Intemic Spain is dedicated to the commercialisation and development of software for the management and optimisation of industrial processes. It specialises in the chemical, automotive and continuous manufacturing sectors.

Products and services

Module or function

- Engine
- Exhaust and manifold

The platform assists in the management and prediction of automotive part manufacturing failures, but does not directly manufacture parts

Auxiliary services

- Engineering
- Machinery and small integrated lines
- Maintenance and services

Predictive maintenance service, parts failure identification, experimentation reduction

Processes and technologies

- Glass processing
- Joining processes
- Other technologies
- Wood processing

Intemic has a software tool that simulates and orchestrates physical processes in which energy costs and quality losses can be reduced. The main innovation is the mathematical algorithm that orchestrates and organises the operations of the nodes. In just one week, the digital twin of a factory is set up, whereas in the past it took companies more than a year.
