## Company description

Plastic Omnium is a world leader in the manufacture of automotive exterior components and modules, supporting and accompanying the customers with 86 factories in 19 countries. Plastic Omnium develops solutions for a more sustainable and connected car.

The Redondela plant was inaugurated in 1991, since then it has produced parts for the Citroën ZX, AX, Xsara Picasso, Berlingo, C4 Picasso, Grand C4 Picasso and Peugeot Partner vehicles.

It currently produces the Citroën bumpers, models: C-Elysée, C4 Spacetourer, Grand C4 Spacetourer and Berlingo, Peugeot Rifter and 301 and Opel Combo, as well as the tailgate of the C4 Spacetourer and Grand C4 Spacetourer.

## Products and services

Module or function

Boot

Exterior elements

Front End

Rear end

Injection of thermoplastic material, painted and assembled for the production of bumpers and rear doors.

Plastic Omnium offers innovative weight-reducing and aerodynamic solutions to reduce fuel consumption and CO2 emissions.

The body parts are integrated into the design of the vehicles, developing an offer with high performance compounds:

- Rear doors with a weight reduction of 30%, compared to steel equipment.
- Bumpers that combine aesthetics, lightness and aerodynamic optimization.

## Processes and technologies

Assembly

Joining processes

Plastic shaping

Surface treatments and finishes

The Redondela factory has in its facilities injection machines with a closing force of 1,000 to 3,200 tons, robotized paint line, bite assembly line, JIT parts served directly to the customer, specific die-cutting and welding machines, gluing technology with robotic cells for the production of a plastic tailgate and packaging line for spare parts.

## Main customers

Stellantis.

PLASTIC OMNIUM

PROYECTO FEDER INTERCONECTA ESFERA

PLASTIC OMNIUM coordina el proyecto ESFERA cuyo objetivo principal es la "Concepción y desarrollo de una nueva superEstructura híbrida más Funcional y ligera para futuros vehículos" en el que también participan PSA GROUP, CARBURES, TROMOSA y LEDISSON y que cuenta con la colaboración de CTAG - Centro Tecnológico de la Automoción de Galicia. El proyecto tiene una duración de 3 años (2019-2021) y se desarrolla en las Comunidades Autónomas de Galicia y Andalucía. El proyecto, con un presupuesto total de 1.737.271€, está subvencionado por el CDTI - Centro para el Desarrollo Tecnológico Industrial - a través del programa FEDER-INTERCONECTA 2015, cuenta con el apoyo del Ministerio de Economía y Competitividad, y está cofinanciado por el Fondo Europeo de Desarrollo Regional (FEDER), dentro del Programa Operativo de Crecimiento Inteligente 2014-2020, con el objetivo de potenciar la investigación, el desarrollo tecnológico y la innovación.
